If so, how? - All candidate projects are considered in a pre-TIP planning process that is integrated with PennDOT’s Linking Planning and NEPA screening forms system as well as the PennDOT Connects process. This system is a tool to gather valuable information from the planning phase to consider and screen candidate projects based on environmental resources, cultural resource, economic factors, and modal connectivity. This screening allows ultimately for the development of a better defined and more predictable program. The information collected during pre-TIP planning is used subsequently to increase the efficiency of the environmental scoping, review, and compliance steps of the project development process. The PennDOT Connects process ensures that planning partners, local governments and other stakeholders are engaged early in the project development process and that each project is considered in a holistic way for opportunities to improve safety, mobility, access, and environmental outcomes for all modes and local contexts.
