■ Rode Away from Downtown

This past May the City of Pittsburgh completed its first-ever citywide count of bicyclists and pedestrians. 76 volunteers were stationed at 38 locations across the city to tally up how people are moving around the city under their own power.

The May 2015 count served primarily to generate a baseline number for which to compare results from future counts. The results compiled for this report represent a snapshot of what walking and biking looked like on a typical May weekday and weekend at the 38 locations. The city intends to repeat the counting process annually.

Please visit <http://pittsburghpa.gov/dcp/bicyclecounts> for more information. Look out for a full release of count data in the future.

Count Pittsburgh: May 2015 Bike/Ped Count

RESULTS BY LOCATION

Average number of bicyclists and pedestrians per hour, all 38 count locations.
