Title: Pkwy East Active Traffic Management
State Route: 376
Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 11/18/21

Actual Construction Bid Date:

Location: I-376 between Downtown Pittsburgh and Monroeville in Allegheny County. Parkway East Corridor Transportation Network

Project Description: The Department is looking at a range of possible Improvement Concepts to improve safety and mobility for all modes of transportation in the Interstate 376 Corridor for both the mainline of Interstate 376 as well as parallel alternate routes and routes which distribute traffic to and from the mainline. Alternatives range from system wide improvements on the mainline such as Ramp Management, Truck Restrictions, and Managed Lanes; to more specific interchange geometric improvements such as eliminating weave movements at Sq. Hill and Churchill interchanges or combining and eliminating ramps at Edgewood Swissvale and Wilksburg. All concepts will have Benefit Cost Ratios developed.

Project Administrator: SPC

Title: SPC - Traffic Signal 4

Improvement Type: Existing Signal Improvement

State Route: 0

Municipality:

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 5/12/22

Actual Construction Bid Date:

Location: regional(Sponsor = SPC) SPC's Regional Traffic Signal Program

Project Description: (Sponsor = SPC) SPC's Regional Traffic Signal Program proposes to continue its mission of improving the operation and safety of the region's key arterial corridors by funding and implementing signal improvement projects that result in optimized and coordinated signal operations. Working with municipalities and PennDOT, this has been achieved with two types of projects:

- SINC-UP projects: These projects include minor equipment upgrades in addition to signal retiming. The equipment upgrades are focused on areas required for signal coordination, energy savings, and safety (communications, controllers, and indications). These projects may also include removal of traffic signals that are no longer warranted.
- SINC projects: These projects include signal retiming only for corridors and intersections that are already adequately equipped for coordination purposes.

PennDOT Project Id: 82615

Project Administrator: PennDOT

Improvement Type: Relocation/Realignment

Municipality: Freedom (BORO)

Title: Freedom Rd Upgrade - Ph A

State Route: 2004

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 9/15/16

Actual Construction Bid Date: 9/15/16

Location: Located on SR 2004 (Freedom Road) from SR 65 to Park Quarry Road in New Sewickley Township, Beaver County.

Project Description: Reconstruction and realignment of portions of S.R. 2004 (Freedom-Crider Road) and Crows Run Road in the Borough of Conway and New Sewickley Township, Beaver County. The project starts near the existing intersection of T-575 (Crows Run Road) and S.R. 0065 (Ohio River Boulevard) in the Borough of Conway and proceeds to approximately 1000 feet east of the existing S.R. 2004 intersection with T-606 (Park Quarry Road) in New Sewickley Township. The project will consist of reconstructing T-575 (Crows Run Road) and relocating S.R. 2004 to follow the T-575 corridor. The new roadway will be widened to include two-11' lanes with 6' shoulders. Turn lanes will be added on S.R. 0065 at the newly signalized intersection with reconstructed Crows Run Road (to be changed to S.R. 2004). A left turn lane will be added to reconstructed Crows Run Road onto S.R. 0065. A center turn lane will be added on S.R. 2004 near the intersection of Park Quarry Road and the newly named S.R. 2018. The total project is 8,910 feet in length (1.69 miles) and includes:

- 1.) Construction of new and replacement structures over Crows Run and its tributaries.
- 2.) Realignment of approximately 400 feet of Romigh Road and reconstruction of the intersection of Romigh Road and the proposed S.R. 2004.
- 3.) Realignment of approximately 800 feet of Park Quarry Road (T-606) and its intersection with S.R. 2004.
- 4.) Reconstruction of S.R. 0065 in the vicinity of the new S.R. 2004 signalized intersection.
- 5.) Relocation of four portions of existing Crows Run stream.
- 6.) Replacement of guide rail, drainage, signing, pavement marking, etc., related to the above items.

Butler

PennDOT Project Id: 24523

Project Administrator: PENNDOT

Title: Moraine State Park Access

Improvement Type: Interchange Improvement

State Route: 422

Municipality: Muddy Creek (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 5/4/17

Actual Construction Bid Date: 5/4/17

Location: From approximately 600 feet west to 2,100 feet east of the US 422/I-79 Interchange in Muddy Creek and Worth Townships.

Project Description: US Route 422/West Park Road interchange improvements include installation of a new loop ramp from US 422 EB to West Park Road and replacement of the existing SR 8002 Ramp J with a new two way road (SR 4017), which will connect US 422 WB and North Shore Drive. I-79/US 422 Interchange improvements include extension of the existing left-turn lane on US 422, which accesses I-79 NB, and installation of a traffic signal at the intersection of US 422 and the I-79 SB Ramps, which is currently unsignalized, in Muddy Creek and Worth Townships.

Title: McClure/Kingview Road Interchange

Improvement Type: Safety Improvement

State Route: 119

Municipality: Upper Tyrone (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 12/12/24

Actual Construction Bid Date:

Location: New Interchange to be constructed over US 119 between, US 119/T-821 (McClure Rd.) and US 119/Kingview Road, Bullskin and Upper Tyrone Townships, Fayette County, Segments 0750/0304 to 0780/2481

Project Description: This project is the review of the US Route 119 McClure Road intersection area in Upper Tyrone Township, Fayette County, to develop a proposal for projects that would update and modernize US Route 119 in this area.

The project will eliminate two signalized intersections on US Route 119 with Kingview Road and McClure Road. A new full-access interchange would be constructed in between the two existing intersections. A new bridge carrying a new connector road would be constructed.

Title: PA 18 Signal Upgrades

Improvement Type: Existing Signal Improvement

State Route: 18

Municipality: Washington (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 2/27/20

Actual Construction Bid Date:

Location: PA 18- City of Washington

Project Description: This project includes the replacement of the following three existing traffic signals located in the City of Washington: PA 18 (Jefferson Avenue) at SR 4022 (Wylie Avenue), PA 18 (Jefferson Avenue) at PA 844, and SR 4022 (Wylie Avenue) at Allison Road. The project also includes two signals located at PA 18 (Jefferson Avenue) at SR 8014 (I-70 Ramps) and SR 4022 (Wylie Avenue) at SR 8014 (I-70 Ramps).

The installation of the new signals will include physical improvements such as: queue preemption for I-70 ramp approaches, detection on all approaches, LED signal heads, pedestrian accommodations, and spread spectrum radio system.

The project also includes various roadway improvements (such as ADA ramps and additional lanes as necessary).

Title: North Strabane Township Signal Updates

Improvement Type: Existing Signal Improvement

State Route: 19

Municipality: North Strabane (TWP)

Air Quality Status: Non-Applicable

Estimated Construction Bid Date:

Actual Construction Bid Date: 1/30/20

Location: The proposed project includes six (6) signalized intersections throughout North Strabane Township primarily along Washington Road (SR 0019).

Project Description: The proposed project includes the improvement of six (6) signalized intersections within North Strabane Township, Washington County, PA. The planned improvements at these intersections are primarily the addition of Emergency Vehicle Protection (EVP) with ancillary equipment upgrades as necessary. The primary purpose of the project however is to provide EVP at the intersections to improve safety and emergency response.

Title: Route 19 - Signal Maintenance

Improvement Type: Existing Signal Improvement

State Route: 19

Municipality: North Strabane (TWP)

Air Quality Status: Non-Applicable

Estimated Construction Bid Date: 1/30/20

Actual Construction Bid Date: 1/30/20

Location: Route 19 (SR 0019) from Waterdam Road (SR 1053) to Valleybrook Road (SR 1010)

Project Description: This project will address critical safety, maintenance, and capacity issues at the project intersections. Route 19 & Valleybrook (SR 1010) - inefficient SB left turn phase will be modified to allow protected-permitted left turns. Route 19 & Gallery Road - replace fading traffic signs and install backplates (SB/EB) to eliminate sunglare issues. Route 19 & Waterdam Road (SR 1053) - replace existing controller (26 yrs old), replace fading traffic signs, and install backplates (SB/EB) to eliminate sunglare issues. These are critical issues that must be addressed this calendar year.

Title: Jeannette - Amos K Bypass

Improvement Type: Interchange Improvement

State Route: 30

Municipality: Hempfield (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Estimated Construction Bid Date: 12/1/11

Air Quality Exempt Reason: R1 - Intersection channelization projects

Actual Construction Bid Date: 12/1/11

Location: US 30 from Jeannette to Amos K Bypass , Westmoreland County, Lane Addition and Traffic Signal Improvements

Project Description: This project is the widening to five lanes for the addition of a 5th lane (center turning lane), the installation of new traffic signals, and resurfacing of US 30 (Lincoln Highway) from Allegheny Power to the Amos K. Hutchinson Bypass in the City of Jeannette and Hempfield Township. Resurfacing will be completed on US 30 during 2012 while utility relocation is being completed.

The current signals will be replaced and there will be signal coordination at the intersections of: Agnew Road & Home Depot. Pennsylvania Avenue is not coordinated with any intersection, this would be ineffective as the next intersection is mile away. The signals at Lowey Avenue & Lewis Avenue are not coordinated but is functioning as one system since the intersections are adjacent.

PennDOT Project Id: 57452

Project Administrator: PennDOT

Title: PA 31: Donegal - PA 381/711 Int

Improvement Type: Intersection Improvement

State Route: 31

Municipality: Donegal (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Estimated Construction Bid Date: 3/16/17

Air Quality Exempt Reason: R4 - Changes in vertical and horizontal alignment

Actual Construction Bid Date: 3/17/17

Location: PA 31 just west of the Donegal Turnpike entrance to just east of the PA 31 / PA 711 / 381 Intersection.

Project Description: This project is a corridor safety improvement project along PA 31 from the Donegal Turnpike exit to the intersection of PA 31/PA 711/PA 381 in Donegal Borough and Donegal Township, Westmoreland County.

State Route 0031, Section X10 is a rural community arterial located in Donegal Borough and Donegal Township, Westmoreland County. The limits of the project are just west of the Pennsylvania Turnpike Exit 91 Interchange to east of the intersection of SR 0031 & SR 0381 South/SR 0711 South/SR 2031. The project scope is to reconstruct this section of SR 0031 to meet current design criteria and provide safety and operational improvements throughout the corridor. At the western end of the project at the Turnpike Exit, SR 0031 will be shifted to the south to increase the distance between the turnpike toll booth area and the intersection with SR 0031. A signalized continuous "T" intersection is proposed for this intersection to allow a continuous flow of eastbound SR 0031 traffic outside the control of the traffic signal and provide protected turning for entering and exiting the turnpike.

The SR 0031 and SR 0711 intersection will include designated turn lanes and a traditional traffic signal. In addition, King's Way will be relocated to be included as part of the signal creating a "plus" intersection with SR 0031 and SR 0711.

Local concern over the safety of the existing School House Road intersection with SR 0031 for the school bus traffic has resulted in its realignment to create a "plus" intersection with SR 0031 at Mountain View Road. To the west of School House Road, a vertical curve in the roadway will be cut back to provide sight distance for left turning traffic. In addition, the horizontal curve through the intersection of SR 0031 & SR 0381/SR 0711/SR 2031 will be flattened to improve sight distance. Other safety and innovative improvements will also be utilized along the corridor as appropriate. Turn lanes will be installed at several locations along the corridor as needed.

Project Administrator: PennDOT

Title: PA 130 @ Pleasant Valley

Improvement Type: Intersection Improvement

State Route: 130

Municipality: Penn (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Estimated Construction Bid Date: 12/21/17

Air Quality Exempt Reason: R2 - Intersection signalization prjcts at ind. inters.

Actual Construction Bid Date: 12/21/17

Location: Penn Township, Westmoreland County.

Project Description: This project is for intersection improvements to the PA 130/Sandy Hill Road/Pleasant Valley Road Intersection in Penn Township, Westmoreland County.

The project begins 200 feet west of the SR 0130/Pleasant Valley Rd./Sandy Hill Rd (segment 0321/0355) intersection and ends 500 feet east of the SR 0130/Pleasant Valley Rd./Sandy Hill Rd. in Penn Township, Westmoreland County. The scope of work will consist of upgrading the intersection including improving the radii, adding left turn lanes on three approaches, resurfacing, installing a new traffic signal, and updating the guide rail and drainage. PTC improved SR 0130 west of the intersection with Bridge replacement project (WB-506,MP-63.06) S-32024.

Title: US 119 New Stanton Lighting/Ramps
State Route: 119
Air Quality Status: Non-Applicable

Estimated Construction Bid Date: 8/23/18

Actual Construction Bid Date: 8/23/18

Location: US 119 and Ramps to I-70

Project Description: This project is for the upgrades and reconstruction of the existing highway lighting system for the ramps that are PennDOT responsibility at interchange involving US 119, SR 3091 and Toll 66. . The project will include reconstruction of the existing concrete roadway on Ramps A (EB SR 3091 to US 119 South) and H (US 119 North to US 119 North) starting at structures that span Railroad/Sewickley Creek and ending at intersections with S.R. 3091 and US 119. Work within this reconstructed area will include replacement of existing bituminous shoulders with concrete shoulders with reconstruction on existing alignment. Within project limits project will replace all guide rail and end treatments to bring guide rail up to current MASH standards. The project also includes concrete patching on other Department maintained ramps including Ramp C (WB S.R. 3091 to US 119 South) Ramp F (US 119 North to S.R. 3091 West) and Ramp D (Toll 66 south to S.R. 3091 West). Signs and Pavement Markings will also be updated. Project is located in New Stanton Borough and Hempfield Township, Westmoreland County.
