Project Description: (Sponsor = SPC) SPC's Regional Traffic Signal Program proposes to continue its mission of improving the operation and safety of the region's key arterial corridors by funding and implementing signal improvement projects that result in optimized and coordinated signal operations. Working with municipalities and PennDOT, this has been achieved with two types of projects:

- SINC-UP projects: These projects include minor equipment upgrades in addition to signal retiming. The equipment upgrades are focused on areas required for signal coordination, energy savings, and safety (communications, controllers, and indications). These projects may also include removal of traffic signals that are no longer warranted.
- SINC projects: These projects include signal retiming only for corridors and intersections that are already adequately equipped for coordination purposes.
