PennDOT Project Id: 100382

Project Administrator: SPC

Title: SPC - Traffic Signal 4

Improvement Type: Existing Signal Improvement

State Route: 50

Municipality: Collier (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 1/12/2023

Location: (Sponsor = SPC) SPC's Regional Traffic Signal Program

Project Description: (Sponsor = SPC) SPC's Regional Traffic Signal Program proposes to continue its mission of improving the operation and safety of the region's key arterial corridors by funding and implementing signal improvement projects that result in optimized and coordinated signal operations. Working with municipalities and PennDOT, this has been achieved with two types of projects:

- SINC-UP projects: These projects include minor equipment upgrades in addition to signal retiming. The equipment upgrades are focused on areas required for signal coordination energy savings, and safety (communications, controllers, and indications). These projects may also include removal of traffic signals that are no longer warranted.
- SINC projects: These projects include signal retiming only for corridors and intersections that are already adequately equipped for coordination purposes.

Title: FACO Signals - 1

Improvement Type: Traffic System Management

State Route: 21

Municipality: South Union (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 10/20/2022

Location: Uniontown: PA 21/Main Street, Washington Twp: PA 201 Fayette Ave/Vernon Ave, Brownsville: High Street/Brown Ave, High Street, Bridge Street, 2nd Street, Masontown: Main Street/Cross Street, Main Street/Church Street

Project Description: This project is for signal enhancement and miscellaneous roadway work at various intersections in Fayette County; work to be performed includes signal replacements, modification and the addition of ADA/pedestrian facilities at most locations. The individual intersections are as follows:

SR 21 and SR 2040 (Main St.), City of Uniontown: This signal is an old system with maintenance issues and poor controller placement. The intersection will receive all new signal equipment including signal poles, mast arms, LED signal heads, new electronics, and ADA signals with pedestrian push buttons. The ADA ramps were recently replaced but will be checked for ADA compliance during design and updated if necessary.

SR 201 and Fayette Ave., Washington Township: This signal is an old system with maintenance issues. The existing signal equipment, installed on strand wires, will be replaced with new signal equipment including signal poles, mast arms, LED signal heads and new electronics. Pedestrians are not accommodated at this intersection.

SR 166 (Main St.) and Cross Street, Borough of Masontown: The existing signal equipment, installed on strand wires and poles, will be replaced with new signal equipment including signal poles, mast arms, LED signal heads and new electronics, and ADA signals with pedestrian push buttons. The ADA ramps were recently replaced but will be checked for ADA compliance during design and updated if necessary.

SR 166 (Main St.) and SR 3010 (Church St.), Borough of Masontown: The existing signal equipment, installed on strand wires and poles, will be replaced with new signal equipment including signal poles, mast arms, LED signal heads and new electronics, and ADA signals with pedestrian push buttons. The ADA ramps were recently replaced but will be checked for ADA compliance during design and updated if necessary.

SR 4003 (High St.) and SR 4025 (Bridge St./Second St., Borough of Brownsville: This signal is an old system with maintenance issues. The intersection will receive all new signal equipment including signal poles, mast arms, LED signal heads, new electronics, and ADA signals with pedestrian push buttons. New ADA compliant ramps will also be installed.

SR 4003 (High St.) and Brown Ave., Borough of Brownsville: This signal is an old system with maintenance issues. The intersection will receive all new signal equipment including signal poles, mast arms, LED signal heads, new electronics, and ADA signals with pedestrian push buttons. New ADA compliant ramps will also be installed.

Title: McClure/Kingview Road Interchange

Improvement Type: Safety Improvement

State Route: 119

Municipality: Upper Tyrone (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 12/11/2025

Location: New Interchange to be constructed over US 119 between US 119/T-821 (McClure Rd.) and US 119/Kingview Road Bullsken and Upper Tyrone Townships, Fayette County Segments 0750/0304 to 0780/2481

Project Description: This project is for intersection improvements on US 119 at McClure Road and Kingview Road in Upper Tyrone and Bullsken Townships, Fayette County. The project will eliminate two signalized intersections on US Route 119 with Kingview Road and McClure Road, and a new full-access interchange would be constructed in between the two existing intersections. A new bridge carrying a new connector road would be constructed.

Title: US 119 Connellsville CMAQ

Improvement Type: New Traffic Signal

State Route: 119

Municipality: Connellsville (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 8/10/2023

Location: US 119 Corridor
City of Connellsville, Fayette County

Project Description: The SR 0119, Section SE4 (US 119 Connellsville CMAQ) project is located in the City of Connellsville, Fayette County. The project consists of traffic signal upgrades at six intersections that include US 119's intersections with: SR 1037 (Pittsburgh Street); McDonald's Driveway; York Avenue; Shopping Plaza Driveway; US 119 Southbound & SR 0711/SR 1051 (Crawford Avenue)/SR 0201 (Vanderbilt Road); and US 119 Northbound & SR 0711 (Crawford Avenue). The project will upgrade traffic signal controllers and other equipment as well as include hardware to support coordination of the intersections to improve traffic flow and reduce congestion and queuing. The project also includes upgrading existing ADA and pedestrian facilities at the signalized intersections, and replacement of signing & pavement markings.

Title: PA 519/SR 1055 Intersect.

Improvement Type: Intersection Improvement

State Route: 519

Municipality: North Strabane (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date: 6/19/2014

Estimated Construction Bid Date: 6/19/2014

Location: PA 519 0120/1500 to 0130/1000 and SR 1055 0090/0900 to 0100/1000 intersection, North Strabane Township, Washington County

Project Description: The project proposes improvements to the existing skewed intersection of SR 519 and SR 1055 (a.k.a. Brownlee Road, to the south, and Thomas Eighty Four Road, to the west), located in North Strabane Township, Washington County PA. The proposed improvement includes the reconstruction of the skewed intersection to provide dual roundabouts. Several other roundabout configurations were considered as well as a more traditional dual signalized intersection; however, the proposed dual roundabout option best addresses the project needs by achieving the highest level of service and capacity for current and design year conditions, best addresses issues of route continuity and safety, reduces environmental and property impacts, operates at a lower and safer design speed, and has a lower initial cost as well as future maintenance costs.

This project is included in District 12-0's Highway Safety Improvement Program.

Title: PA 18 Signal Upgrades

Improvement Type: Existing Signal Improvement

State Route: 18

Municipality: Washington (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date: 2/27/2020

Estimated Construction Bid Date: 2/27/2020

Location: PA 18- City of Washington

Project Description: This project includes the replacement of the following three existing traffic signals located in the City of Washington: PA 18 (Jefferson Avenue) at SR 4022 (Wylie Avenue), PA 18 (Jefferson Avenue) at PA 844, and SR 4022 (Wylie Avenue) at Allison Road. The project also includes two signals located at PA 18 (Jefferson Avenue) at SR 8014 (I-70 Ramps) and SR 4022 (Wylie Avenue) at SR 8014 (I-70 Ramps).

The installation of the new signals will include physical improvements such as: queue preemption for I-70 ramp approaches, detection on all approaches, LED signal heads, pedestrian accommodations, and spread spectrum radio system.

The project also includes various roadway improvements (such as ADA ramps and additional lanes as necessary).

Project Administrator: PennDOT

Title: PA 31: Donegal - PA 381/711 Int

Improvement Type: Intersection Improvement

State Route: 31

Municipality: Donegal (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date: 3/17/2017

Estimated Construction Bid Date: 3/16/2017

Location: PA 31 just west of the Donegal Turnpike entrance to just east of the PA 31 / PA 711 / 381 Intersecton.

Project Description: This project is a corridor safety improvement project along PA 31 from the Donegal Turnpike exit to the intersection of PA 31/PA 711/PA 381 in Donegal Borough and Donegal Township, Westmoreland County.

State Route 0031, Section X10 is a rural community arterial located in Donegal Borough and Donegal Township, Westmoreland County. The limits of the project are just west of Pennsylvania Turnpike Exit 91 Interchange to east of the intersection of SR 0031 & SR 0381 South/SR 0711 South/SR 2031. The project scope is to reconstruct this section of SR 0031 to meet current design criteria and provide safety and operational improvements throughout the corridor. At the western end of the project at the Turnpike Exit, SR 0031 will be shifted to the south to increase the distance between the turnpike toll booth area and the intersection with SR 0031. A signalized continuous "T" intersection is proposed for this intersection to allow a continuous flow of eastbound SR 0031 traffic outside the control of the traffic signal and provide protected turning for entering and exiting the turnpike.

The SR 0031 and SR 0711 intersection will include designated turn lanes and a traditional traffic signal. In addition, King's Way will be relocated to be included as part of the sign creating a "plus" intersection with SR 0031 and SR 0711.

Local concern over the safety of the existing School House Road intersection with SR 0031 for the school bus traffic has resulted in its realignment to create a "plus" intersection w SR 0031 at Mountain View Road. To the west of School House Road, a vertical curve in the roadway will be cut back to provide sight distance for left turning traffic. In addition, the horizontal curve through the intersection of SR 0031 & SR 0381/SR 0711/SR 2031 will be flattened to improve sight distance. Other safety and innovative improvements will also be utilized along the corridor as appropriate. Turn lanes will be installed at several locations along the corridor as needed.

Title: Salina Bridge

Improvement Type: Bridge Replacement

State Route: 1060

Municipality: Bell (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 11/2/2023

Location: BMS# 64 1060 0010 0000

Project Description: The S.R. 1060 (Bridge Street)/Salina Bridge over the Kiskiminetas River and Norfolk Southern Railroad connects Bell Township, Westmoreland County with Kiskiminetas Township, Armstrong County. The project proposes to replace the Salina Bridge on a new alignment located immediately downstream from the existing bridge. The proposed bridge is anticipated to be a 3-span continuous composite steel plate girder bridge. The project will also address the existing deteriorated retaining wall parallel with SR 1060 approaching the bridge from the south. The approach roadway will be widened to provide 11' travel lanes and 5' shoulders. The intersections at each end of the bridge will be modified to improve maneuverability. Drainage will be upgraded as well as the guiderail, signs, and pavement markings.

No new capacity will be added

Title: LVTIP: PA 819 to Norvelt (PA 981-Q20)

Improvement Type: Corridor Safety Improvement

State Route: 981

Municipality: Mount Pleasant (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date: 7/29/2021

Estimated Construction Bid Date: 7/29/2021

Location: PA 819/PA 981 Intersection to Norvelt (981-Q20)
Mount Pleasant and Unity Townships, Westmoreland County

Project Description: The LVTIP (Laurel Valley Transportation Improvement Project) project will upgrade the PA 981 corridor from the intersection with PA 819 in Mount Pleasant Township to the intersection with US 30 in Unity Township, Westmoreland County.

The LVTIP will be constructed in three separate sections. The first (southern most) to be advanced will be the 981-Q20 which will extend from the intersection of SR 981 and PA 819 northward along 981 to Norvelt in Mount Pleasant Township.

Corridor improvements would include on-line upgrades as well as segments of new alignment where upgrades are not feasible due to physical/environmental constraints.

Title: LVTIP: Norvelt to Pleasant Unity

Improvement Type: Relocation/Realignment

State Route: 981

Municipality: Mount Pleasant (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 10/30/2025

Location: PA 981 from Norvelt to Pleasant Unity, Mount Pleasant Township, Westmoreland County

Project Description: This project is for corridor improvements to PA 981 from the village of Norvelt to the village of Pleasant Unity in Mt Pleasant Township, Westmoreland County.

SR 981, Section V20 is approximately 3.5 miles and begins north of the SR 981 and SR 2021 (Kecksburg Road)/Mt. Pleasant Road intersection (Norvelt intersection) in Mount Pleasant Township. From just north of the Norvelt intersection, the project area extends generally along SR 2023 to the intersection with SR 130 in Unity Township. Section V20 primarily follows existing SR 2023 with some offline shifts to improve the roadway.

Title: LVTIP: Pleasant Unity to Airport

Improvement Type: Relocation/Realignment

State Route: 981

Municipality: Unity (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 10/31/2024

Location: PA 981 from Pleasant Unity to Airport
Mt Pleasant and Unity Townships, Westmoreland County.

Project Description: The LVTIP (Laurel Valley Transportation Improvement Project) project will upgrade 12 miles of the PA 981 corridor from the intersection with PA 819 in Mount Pleasant Townsh to the Westmoreland County Airport in Unity Township.

The LVTIP will be constructed in three separate sections. Section Y10 is the northern most and will tie into the recently completed 981-V10 project near the airport. SR 981-Y10 is approximately 2.5 miles in length and begins just south of the intersection of Bingham Road and the SR 2023 (Hill Churches Road) intersection in Mt. Pleasant Township. SR 981 Y10 then primarily follows existing SR 2023 northward to near the intersection with Green Street. At this point, the alignment proceeds in a northwestward direction to the Westmoreland Airpark. It then extends through the Airpark along the southern portion of Bay Hill Drive then intersects with existing SR 981 just south of the Arnold Palmer Airpo

Corridor improvements would include on-line upgrades as well as segments of new alignment where upgrades are not feasible due to physical/environmental constraints.
